Nep Tech Pal

Office Management System

UX Case Study

Duration
December - July 2021

Product Overview

Nep Tech Pal is a comprehensive office management system designed to streamline and automate various administrative tasks, enhance employee productivity, and improve overall workplace efficiency. It integrates multiple functionalities into a single platform, reducing the need for manual processes and minimizing errors. Key features typically include employee management, time tracking, attendance monitoring, leave management, payroll processing, and performance evaluation.

Responsibility

- Research
- Wireframing
- Prototyping
- Visual Design
- Interaction Design
- Optimal Workshop

Tools

- Figma
- Adobe XD
- Miro
- Optimal Workshop

Problem Statement

Nep Tech Pal aims to address the challenges faced by businesses in managing their workforce and administrative tasks. It seeks to provide a centralized solution that simplifies complex processes, reduces administrative overhead, and empowers employees with self-service capabilities.

Goals

- Streamline HR processes
- Improve employee engagement
- Enhance data accuracy
- Reduce administrative costs
- Increase employee satisfaction
- Provide valuable insights for decision-making

Design Process

The design process for Nep Tech Pal is dedicated to understanding and addressing the unique needs of its users. It's a collaborative and iterative approach that involves research, ideation, prototyping, and testing to create a user-friendly and efficient office management system. The goal is to empower employees and streamline administrative tasks, ultimately contributing to a more productive and harmonious workplace.

Design Timeline

Target Audience

Nep Tech Pal's target audience encompasses a wide range of businesses and organizations that can benefit from its comprehensive office management features. Here's a breakdown of the key target audience segments:

User Research

User research has been an essential step in understanding the needs and preferences of the people who will be using Nep Tech Pal. By conducting research, we've gained valuable insights that have informed the design and development of the system, ensuring that it is user-friendly, efficient, and effective.

Competitive Analysis

Competitive analysis is a crucial step in understanding the landscape of office management software and identifying opportunities for differentiation. By analyzing the strengths and weaknesses of existing solutions, we can position Nep Tech Pal to offer unique value to its target audience.

Company Name	Empulse (Powered by Nep Tech Pal)	Work Sum	HERO Internet Pvt. Ltd.
Company Info	Nepal's leading HR Tech company	Nepal's leading HR Tech company	Nepal's leading HR Tech company
Product	✅	✅	✅
Attendance	✅	✅	✅
Leave	✅	✅	✅
Payroll	✅	✅	✅
Time Tracking	✅	✅	✅
Document Management	✅	✅	✅

Unique Features

- Comprehensive platform to engage, track, and manage tasks and deadlines, ensuring visibility and accountability for all team members.
- Streamlined leave management system with automated approval workflows, reducing administrative overhead and minimizing errors.
- Real-time attendance tracking with biometric integration features, reducing the need for time-consuming tasks and ensuring accurate records.
- Customizable dashboards and reporting tools, providing valuable insights into employee performance, attendance trends, and resource allocation, empowering data-driven decision-making.

Quantitative Research

Quantitative research is a crucial step in understanding the needs and preferences of our target audience. By collecting and analyzing numerical data, we can gain valuable insights that inform the design and development of Nep Tech Pal.

- Conducted surveys, A/B and competitor's analysis to design, track, and manage tasks across teams, ensuring that the platform meets the specific needs of its users.
- Implemented a comprehensive leave management system, allowing employees to request leave, managers to approve or reject requests, and HR to track leave balances and generate reports.
- Integrated biometric attendance tracking devices to automate attendance tracking and reduce manual errors.
- Developed customizable dashboards and reporting tools to provide insights into employee performance, attendance trends, and resource utilization.

Observations

60%
Task Visibility: 60% of users are open with seeing the progress of their tasks.

70%
Task Priority: 70% of users prefer to prioritize their tasks.

65%
Data Entry Overhead: 65% of users find manually entering data into multiple systems to be time-consuming.

30%
Customization Challenges: 30% of respondents encountered difficulties customizing the platform to their specific needs.

90%
Real-Time Notifications: 90% of users prefer receiving real-time notifications for important updates and deadlines.

50%
Dashboard Customization: 50% of respondents would like more options to customize their dashboards.

50%
Performance Reviews: 50% of respondents would like more frequent performance reviews and feedback opportunities.

80%
Mobile Access: 80% of users prefer to access the platform on mobile devices.

Empathy Map

Pain Points

- **Inefficient Task Management**
  - Difficulty tracking progress
  - Missed deadlines
  - Lack of visibility into team workload
- **Communication Gaps**
  - Delays in receiving updates
  - Misunderstandings due to unclear communication
  - Difficulty collaborating on tasks
- **Lack of Transparency**
  - Limited visibility into project status
  - Difficulty identifying bottlenecks
  - Inability to hold team members accountable

User Persona

User Journey Map

Persona: Jagat Dwoketa

Action	Receiving Task & Understanding	Collaborating with Team Members	Task Progress Monitoring	Meeting Deadline & Task Completion
Task List	Task Details	Communication Channels	Progress Tracking	Completion Confirmation
Feeling	Confused	Frustrated	Overwhelmed	Relieved
Thoughts	"I don't understand this task."	"I need to ask for clarification."	"I'm falling behind schedule."	"I'm glad I finished on time."
Improvement Opportunities	Clear Task Descriptions	Improved Communication Tools	Real-time Progress Updates	Positive Reinforcement

Sketches/Low-fidelity Wireframes

Login Screen: High Fidelity

The header includes the app logo, a search bar, and user profile icon for easy navigation.

The content area is split into two sections: a list of leave requests and a calendar view.

The bottom navigation bar provides quick access to different sections of the app.

Leave Request Screen: High Fidelity

The screen displays the user's leave balance, including the number of days remaining for each leave type.

A list of previous leave requests is shown, with details such as the start and end dates, leave type, and status (approved, pending, or rejected).

A prominent button allows the user to submit a new leave request.

High Fidelity Screen

The "Upcoming Events" section displays a list of upcoming events, including their titles, dates, and times.

The "Quick Actions" section provides shortcuts to frequently used features, such as creating a new task or scheduling a meeting.

The bottom navigation bar allows users to switch between different sections of the app, such as "Home," "Tasks," "Calendar," and "Profile."

Key Takeaways

Nep Tech Pal's office management system can ensure that user testing is carried out. It can also be used to gather feedback from users and identify areas for improvement.

1. Streamlining Process Design
Nep Tech Pal can help streamline the testing process. Through UX research and user feedback, we can gain valuable insights into how users interact with the system and identify areas for improvement. This can help us make data-driven decisions and prioritize changes that will have the most impact.

2. The Power of Collaboration
Nep Tech Pal can facilitate collaboration between different departments and stakeholders. Through UX research and user feedback, we can gain a shared understanding of the system's strengths and weaknesses and work together to make improvements.

3. The Impact of Iterative Design
Nep Tech Pal can support iterative design by providing a platform for collecting feedback and tracking changes over time. This can help us make incremental improvements and ensure that the system is always evolving to meet the needs of its users.

4. Accessibility at the Core
Nep Tech Pal can help us test for accessibility. It can identify potential barriers that users may face and help us make sure that the system is usable by everyone, regardless of their abilities.

5. Empowering Users Through Feedback
Nep Tech Pal can empower users to provide feedback and contribute to the design process. By collecting feedback and tracking changes, we can show users that their opinions are valued and that we are committed to making the system better for them.

6. Leveraging Data for Continuous Improvement
Nep Tech Pal can help us leverage data to drive continuous improvement. By collecting and analyzing user data, we can identify trends, patterns, and areas for improvement. This can help us make data-driven decisions and prioritize changes that will have the most impact on the user experience.

Roadmap

Nep Tech Pal's roadmap is a strategic document outlining the platform's vision, challenges, and opportunities. It serves as a guide for development, ensuring alignment with user needs and business goals.

1. Understanding the Problem Space
Nep Tech Pal can help us understand the problem space we're investigating. It can provide us with valuable insights into the challenges and opportunities that exist in the office management space. By leveraging this information, we can develop a more effective and efficient solution. It can help us gain a deeper understanding of the problem space we're investigating. It can provide us with valuable insights into the challenges and opportunities that exist in the office management space. By leveraging this information, we can develop a more effective and efficient solution.

2. Research & User Insights
Nep Tech Pal can help us conduct user research. It can support the design. It can help us conduct research to understand the needs and preferences of our users. It can provide us with valuable insights that can inform the design and development of the system. It can help us conduct research to understand the needs and preferences of our users. It can provide us with valuable insights that can inform the design and development of the system.

3. Defining the Strategic Roadmap
Nep Tech Pal can help us develop a strategic roadmap. Collaboration platform with Zoom integration. It can help us identify the key features and functionalities that we need to include in the system. It can help us prioritize these features, set timelines, and track our progress. It can help us identify the key features and functionalities that we need to include in the system. It can help us prioritize these features, set timelines, and track our progress.

4. Development Process
Nep Tech Pal can help us manage the development process. It can help us track the progress of the development team, identify any issues or roadblocks, and make sure that the project is on track. It can help us track the progress of the development team, identify any issues or roadblocks, and make sure that the project is on track.

5. Testing & Validation
Nep Tech Pal can help us test and validate the system. It can help us identify any bugs or issues, and make sure that the system is working as intended. It can help us test and validate the system. It can help us identify any bugs or issues, and make sure that the system is working as intended.

6. Launch & Beyond
Nep Tech Pal can help us launch the system and support it after launch. It can help us monitor the system's performance, identify any issues or roadblocks, and make sure that the system is meeting the needs of its users. It can help us launch the system and support it after launch. It can help us monitor the system's performance, identify any issues or roadblocks, and make sure that the system is meeting the needs of its users.
